*International Journal of*
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 4, ISSUE Nos 1–4

*ISSUE No.* 1 January–March

System Implications of 14/11 GHz Path Depolarization. Part I: Predicting the Impairments: D. V. Rogers and J. E. Allnutt . . . . . 1

System Implications of 14/11 GHz Path Depolarization. Part II: Reducing the Impairments: J. E. Allnutt and D. V. Rogers . . . . . 13

Development of a Prototype, Experimental Single-channel Sequencing Navstar GPS Receiver: Part I—Hardware Implementation: M. T. Allison and P. Daly . . . . . 19

Development of a Prototype, Experimental Single-channel Sequencing Navstar GPS Receiver: Part II—Software Description: M. T. Allison and P. Daly . . . . . 35

A Classification of System Structures Involving Frequency Re-use and Cross-polar Cancellation: N. J. McEwan and A. Ghorbani . . . . . 51

BOOK REVIEWS . . . . . 59

*ISSUE No.* 2 April–June

Editorial . . . . . 61

The TNS Program: A Computer Simulation Package for the INTELSAT TDMA Network: H. Shinonaga, N. Yamasaki, K. Koga and T. Muratani . . . . . 63

Design of a Selective FEC Subsystem to Counteract Rain Fading in Ku-Band TDMA Systems: G. R. McMillen, B. A. Mazur and T. Abdel-Nabi . . . . . 75

INTELNET Services—A Global Data Distribution and Collection Scheme: S. Jamshidi and L. N. Nguyen . . . . . 83

Pointing Losses in Single-axis and Fixed-mount Earth-station Antennas due to Satellite Movement: L. M. Buchsbaum . . . . . 89

TECHNICAL NOTE

North–South Coupling Study: J. Pardo . . . . . 97

TUTORIAL

An Introduction to Antenna Technology—Part 1: W. R. Calvert . . . . . 107

*ISSUE No.* 3 July–September

FM/TV Interference into Rate 1/2 FEC Encoded SCPC/QPSK: J. Dutronc, J. M. Freixe, D. Prouse and R. Cooke . . . . . 111

Field Test Results of Multi-Channel Digital TV Transmission at 15 and 30 Mb/s through an INTELSAT Satellite Using a PSK/FDMA System: H. Murakami, G. Sato, S. Matsumoto, T. Hirabayashi, H. Yamamoto, W. W. Donald and E. Bachmann . . . . . 127

Efficient Adaptive Forward Error Control Schemes for $K_a$-Band Satellite Systems: M. H. Khan, T. Le-Ngoc and V. K. Bhargava . . . . . 139

An Improved Step-track Algorithm for Tracking Geosynchronous Satellites: M. Richharia . . . . 147

SATELLITE LIBRARY NOTES . . . . . 157

FORTHCOMING MEETINGS . . . . . 159

INFORMATION . . . . . 159

*ISSUE No.* 4 October–December

Satellite Networks in the ISDN Era: P. Amadesi, P. Haines and A. Patacchini . . . . . 161

A Coded 8-PSK System for 140 Mb/s Information Rate Transmission over 80 MHz Non-linear Transponders: R. J. F. Fang . . . . . 171

Economics of Multiple Beam Satellites: S. J. Campanella, B. A. Pontano and T. Kao . . . . . 183

16 kb/s High Quality Voice Encoding for Satellite Communication Networks: Y. Yatsuzuka, T. Yamazaki and S. Iizuka . . . . . 193

Access Protocol Performance for On-Board Processing Business Satellite Systems: M. H. M. El Amin, L. N. Chung and B. G. Evans . . . . . 203

Technical and Economic Impact of the Use of Standard-B Earth Stations in the Intelsat System: F. Rancy and P. Zermizoglou . . . . . 211

Universal Digital TV Codec – Unicodec: K. Kinuhata, P. Nuspl, A. Kwan, H. Yamamoto, H. Murakami and S. Matsumoto . . . . . 221

FORTHCOMING MEETINGS . . . . . 229

Author Index . . . . . 231

Key Word Index . . . . . 231
